

Homework 2

[Start Assignment](#)

- Due Monday by 11:59pm
- Points 20
- Submitting a file upload
- File Types mov, pdf, docx, html, mp4, r, and rmd

The description is attached.

[hw2.docx \(https://canvas.wisc.edu/courses/450230/files/43483311?wrap=1\)](https://canvas.wisc.edu/courses/450230/files/43483311?wrap=1)

HW2 Rubric

Criteria	Ratings			Pts
Discussion Quality - Interesting facts	1.5 pts Excellent Organized, complete discussion. Describes expected patterns and either they confirm them or notes surprises.	1 pts Good Organized, but somewhat underdeveloped discussion. Highlights obvious patterns without relating them to the designer's personal knowledge.	0.5 pts Needs Improvement At times disorganized or underdeveloped discussion. Would benefit from more careful proofreading.	1.5 pts
Discussion Quality - Interface creation -0.5 if no link to the functioning app or a video recording of its being used.	2 pts Excellent Fully explain and justifies visualization design decisions.	1.5 pts Good Explain implementation process but at times could warrant more nuanced discussion or justification.	1 pts Needs Improvement Limited discussion of the design process. Would benefit from more careful proofreading.	2 pts
Discussion Quality - Reactive Graph Structure	1.5 to >0.0 pts Full Marks 0.5 points - Correct identification of all reactive graph nodes; 0.5 points - Correct identification of all reactive graph edges; 0.5 points - Justification for the drawn graph structure.			0 pts No Marks 1.5 pts
Design Choices - Design Appropriateness	3 to >2.0 pts Excellent Nuanced design that addresses the questions raised in the discussion and problem formulation. Gives both an approachable overview and strategies to understand details of interest.	2 to >1.0 pts Good Design is effective, though potentially could benefit from more refinement. May be over-reliant on designs introduced in class, without experimenting with alternatives that could improve visibility of either the high-level overview or details of interest.	1 to >0 pts Needs Improvement Design is not well-suited to the questions of interest. May include unnecessary summarization or detail.	3 pts
Design Choices - Design Implementation	2 to >1.0 pts Excellent Regardless of the design appropriateness, it is thoughtfully implemented, ensuring clarity and readability throughout. Obvious independent thought to improve aesthetic details.	1 to >0 pts Good Generally good design (color, readability, layout), but some details could benefit from more refinement (e.g., facet or legend labels directly from the data, when they should be translated into more meaningful language for the audience).	0 to <1 pts Needs Improvement Design needs more refinement. May be missing important annotation, labels may be unreadable, and might suffer from visual clutter.	3 pts
---	0 pts Full Marks			0 pts

Criteria	Ratings				Pts
Problem Formulation - Data background and discussion	2 to >1.0 pts Excellent Engaging and thorough discussion of the data background and the reasons that it is interesting.	1 to >0.5 pts Good Thorough but at times generic discussion of the data and the reasons that it is interesting.	0.5 to >0 pts Needs Improvement Vague or incomplete discussion of the data and the reasons it is interesting.		2 pts
Problem Formulation - Framing Questions	3 to >2.0 pts Excellent Original, creative questions that are motivated by the problem context.	2 to >1.0 pts Good Natural questions based on the structure of the data, though at times may be more motivated by convenience than what is interesting to the problem	1 to >0 pts Needs Improvement At times generic questions that do not reflect study of the overall problem context.		3 pts
Code Useability	4 pts Excellent The code to generate the figures is readable and can be run easily.	3 pts Good Code is easily re-used but readability could be improved (better variable names, organizing code blocks, removing unnecessary duplication).	2 pts Needs Improvement Code is shared but some parts have to be changed in order to run properly (e.g., data paths).	0 pts No Marks No code shared.	4 pts
Total Points: 20
